

DESPERATE HOUSECAT CLOVER A914970

Hands down, **CLOVER** is one of the most affectionate, sweetest cats you will ever meet! She was brought to AAC with several other cats after they lost their home. She has knee issues (possibly the result of injury), and could benefit from orthopedic surgery. If surgery is selected as **CLOVER**'s treatment plan, multiple surgeries will likely be necessary. However, management of arthritis/pain control may also be an option for her. **CLOVER** has adapted well to her situation, and currently she doesn't seem to be in any pain. She moves around great (she climbs cat trees and can get up on furniture). **CLOVER** LOVES people, wanting to be wherever her humans are. She walks up to her foster mom as soon as she enters the room, and follows her around. **CLOVER** will do well in almost any home, with or without other cats.
