

DESPERATE HOUSECAT ELSIE A739374

ELSIE is perfect in SO many ways! She arrived at AAC as a stray with a badly damaged leg, and was moved into a foster home for 5 months of cage rest (while wearing a splint). **ELSIE** LOVES to be petted and will rub up against you while you're doing housework or brushing your teeth. She chases her toys across the room, and loves to 'love' on her kicker toys. **ELSIE** will always have a slight limp, but that just makes her more adorable. She can hop on the bed, but can't climb high enough to get on countertops or tables. **ELSIE** is afraid of other animals (she had her share of run-ins as a stray) and needs to be the only pet in the home.
