

DESPERATE HOUSECAT GATO A758538

GATO is used to an indoor/outdoor life, so he's not too thrilled about living in a shelter environment. He was brought to AAC because his owner could no longer keep him. According to his owner, **GATO** is playful, likes to be held, and is great with dogs. He's affectionate, calm, and enjoys just laying around. He's a bit 'on edge' now, and we believe that once **GATO** is in a home where he can safely spend time outside, he will resume his laid back nature. **GATO** may not get along with other cats.
