

DESPERATE HOUSECAT MONKEY A817137

MONKEY is **FINALLY** ready for her permanent home! She arrived at AAC as a kitten with a **deformed right leg**, and after she became an adult, surgery was performed to straighten it. The surgery was successful, but months later, due to the severity of the deformity, **MONKEY** still couldn't extend her toes properly. The decision was made to amputate her leg, and now she's fully recovered. She gets around very well, perhaps even better than she did with a bum leg.

MONKEY **LOVES** people! She is very social, is a lap cat, and is very playful. She loves to cuddle, and has never met a stranger. **MONKEY** is good with other cats (unless they intimidate her), and would probably be fine with cat-friendly dogs. She should do well with older children.

- ◆ 1 year old, black and white, spayed, TRIPOD
- ◆ INTAKE: 5/8/2020
- ◆ Loves to play
- ◆ Social - Has never met a stranger
- ◆ Lap Cat; Cuddler
