

DESPERATE HOUSECAT MOUSE A742466

MOUSE is having a tough time! After her owner passed away, she stayed with a friend of theirs, but they brought her to AAC after a month because she didn't get along with the other cats in the home. The shelter is no place to be when you are older and don't like other cats! **MOUSE** is a little shy when she meets someone, but she warms up quickly. We found her to be delightful (although a bit guarded) during her photo shoot. **MOUSE** seems to be a lap cat, and to enjoy being petted. We know that her true personality will emerge once she is away from the shelter. **MOUSE** needs a patient adopter and a quiet home.
