

DESPERATE HOUSECAT SHADI A746341

Super sweet and super adorable, **SHADI** is also a little shy when you first meet her. She was brought to AAC as a stray with a flea infestation. This caused thinning hair and scabs all over her body, and a mouth infection. We moved **SHADI** into a foster home for treatment, and now she's completely recovered. It didn't take her long to get used to her foster mom, and she was soon seeking attention (jumping in her lap and giving head butts). **SHADI** is very tolerant of other cats, although sometimes she can be a little possessive of the food dish. 😊 **SHADI** is very playful and is good with older children. She does NOT like dogs.
