

# DESPERATE HOUSECAT WOODY A866672

In the words of his foster mom, **WOODY** is 100% CUTE! He arrived at AAC as a stray with a severe head tilt and a minor bend in his tail. He is very vocal at times, and sometimes when he's playing hard he loses his orientation, so it's possible that **WOODY's** hearing is slightly diminished. He was thoroughly examined (which included xrays), and no infection or polyps were discovered. The shelter DVMs concluded that **WOODY** may have been injured when he was extremely young. Regardless of the cause, he is now very healthy and happy. His head tilt has decreased, and may continue to do so. **WOODY** loves to cuddle, and loves, LOVES, LOVES to chase a wand toy. He's not always comfortable being picked up, but that may change in time. **WOODY** is great with other cats, and would probably be good with dogs and children.
