DESPERATE HOUSECAT
FRITTER 27479

Look at this gorgeous boy! FRITTER is a shy, nervous kitten who was brought to AAS with his siblings from a community area. His right eye had some mild symblepharon after a URI, and the fused tissues were covering half of the pupil. During his neuter surgery, the surgeon was able to **trim the tissue back** so that he has better vision. **FRITTER** moved into a foster home, and after several weeks of eye medications, **all eye tissues have stabilized**. He could have a flare up during times of stress, so he needs to be monitored. He is **not on any medication** at this time. **FRITTER is still shy with humans, so he is a member of our CACTUS CATS program** - http://austintexas.gov/page/cactus-cats. He absolutely **loves other cats/kittens**, and would be happiest in a quiet home with at least one cat buddy. He **can be petted**, although sometimes he is nervous when he sees a hand coming towards him. Once you start petting him, he relaxes and even purrs. **FRITTER** is **playful**, and interacting with him can **help him feel more confident. He'll need some time to adjust to a new environment and may initially hide.**

- **DOB: 4/5/2026, orange tabby, neutered**
- **INTAKE: 6/7/2026**
- Shy; Playful; Likes being petted (go slow)
- **Would like a cat buddy**
- Needs a patient person to help him boost his confidence
- **Great with other cats/kittens; Unknown around dogs; Not recommended for children**

The adoption fee is WAIVED for FRITTER and ALL Desperate Housecats!
