

DESPERATE HOUSECAT TEDDY 31777

TEDDY was brought to AAS because her living situation was no longer a good fit. She moved into foster care, and her **big personality** has begun to shine through! She's very **playful and active**. She gets zoomies in the morning and at night and will run laps around your home.

TEDDY really likes feather toys, but will stalk and chase anything that moves! She **loves to talk** and will greet you with meows and **tumble at your feet** when you come home! She likes to jump onto elevated surfaces and sharpen her claws, so cat trees/cat shelves/scratchers are a must. **TEDDY** is very independent and mostly sleeps during the day, which makes her a great companion for someone who is away during that time. She is a diva who definitely asserts her boundaries: she's **not a big fan of being petted**, but she can be picked up briefly for placement in a carrier. **TEDDY** needs a couple of days to adjust to a new environment. Then she **will rub her head on you and stand on your feet**. She also likes to stomp/march with her back feet (adorable). When she's curled up, her **gorgeous tabby pattern** makes her look like a cinnamon roll. **TEDDY** isn't a huge fan of sudden, erratic movements, so a **quiet home is a must**.
