

# DESPERATE HOUSECAT TWIGGY 21632

When you look at **TWIGGY**, your heart will absolutely melt. She was living as a community cat, and her caregiver brought her to AAS when they noticed that **TWIGGY** was pawing at her mouth. After being examined, it was determined that she needed dental surgery to remove a number of diseased teeth (she has a few left). **TWIGGY** recovered quickly, and still eats dry food (she likes wet also). She is on the shy side, so will need time in a quiet home to acclimate. She loves being petted, but hesitates to approach humans for affection. Be patient as **TWIGGY** gains confidence, and soon she'll be coming up to you, and may even climb in your lap.
